

Yassin Ahmed

Data analyst & Data scientist | Frontend Web Developer

Profile

Motivated STEM student with strong skills in Python, AI/ML, and data analysis. Recognized in the Egyptian Olympiad in Computational Science (Top 20%) and active in national STEM initiatives. Passionate about applying technology to real-world challenges.

Projects

Sales Data Insights • [GitHub](#)

Analyzed sales data to identify trends, top products, and regional distribution.

Predictive Maintenance • [GitHub](#)

Built an LSTM model to forecast equipment failures with data analysis.

Image Classification • [GitHub](#)

Developed a CNN in PyTorch to classify CIFAR-10 images.

Learn Today, Lead Tomorrow • [GitHub](#)

Created an interactive educational website promoting computer science awareness.

Certificates

Data Science from 3C School Academy • [Link](#)

April 2024

Learned Python, AI/ML foundations, and data analysis for practical data science projects.

Certificate Digital Egypt Cubs Initiative Level 1 (DECI) from MCIT & Udacity •

[Link](#)

October 2024

Developed basic computing, AI, and programming skills.

Certificate Digital Egypt Cubs Initiative Level 2 (DECI) from MCIT & Udacity •

[Link](#)

October 2025

Learned Python, web development, and core data analysis skills.

Egyptian Olympiad in Computational Science (EOCS) from Egypt University of Informatics (EUI)

October 2025

Competed nationally in computational thinking, problem-solving, and programming

Preparing for the Job Market, Workshop from Lingua Stochos • [Link](#)

July 2025

Learned CV writing, freelancing, and AI tools.

Training of Trainers (TOT) from Youth Diplomatic Authority

September 2025

Developed communication, leadership, public speaking, and practical training skills.

ARTIFICIAL INTELLIGENCE AMBASSADORS PROGRAM from MCIT & NTI & ESE

February 2026

It aims to prepare participants for integrating AI into their professional fields, enhancing efficiency and innovation.
